

Our Mission

Vericon is an organization built on the belief that employers understand the inherent value and sensitivity surrounding employment selection. They demand commitment and value from their business partners.

It is our goal to provide a simple, thorough, up-to-date background screening system for companies to accurately choose the ideal candidate for employment.

Vericon Resources, Inc.

MAKING THE *right* DECISION SIMPLER.

USING THEIR PAST TO PREDICT YOUR *future.*

*It's who we are.
It's what we do.*

Founded in 1988, and headquartered in Atlanta GA, Vericon Resources Inc. is the premiere background investigation business specializing in employment screening. We were established with the mission to provide the modern business community a complete array of highly professional, strictly confidential, expert investigative services.

In keeping with our standards of professionalism and confidentiality, we are dedicated to the protection of our customers from potentially damaging situations by offering services that are in full compliance with the law.

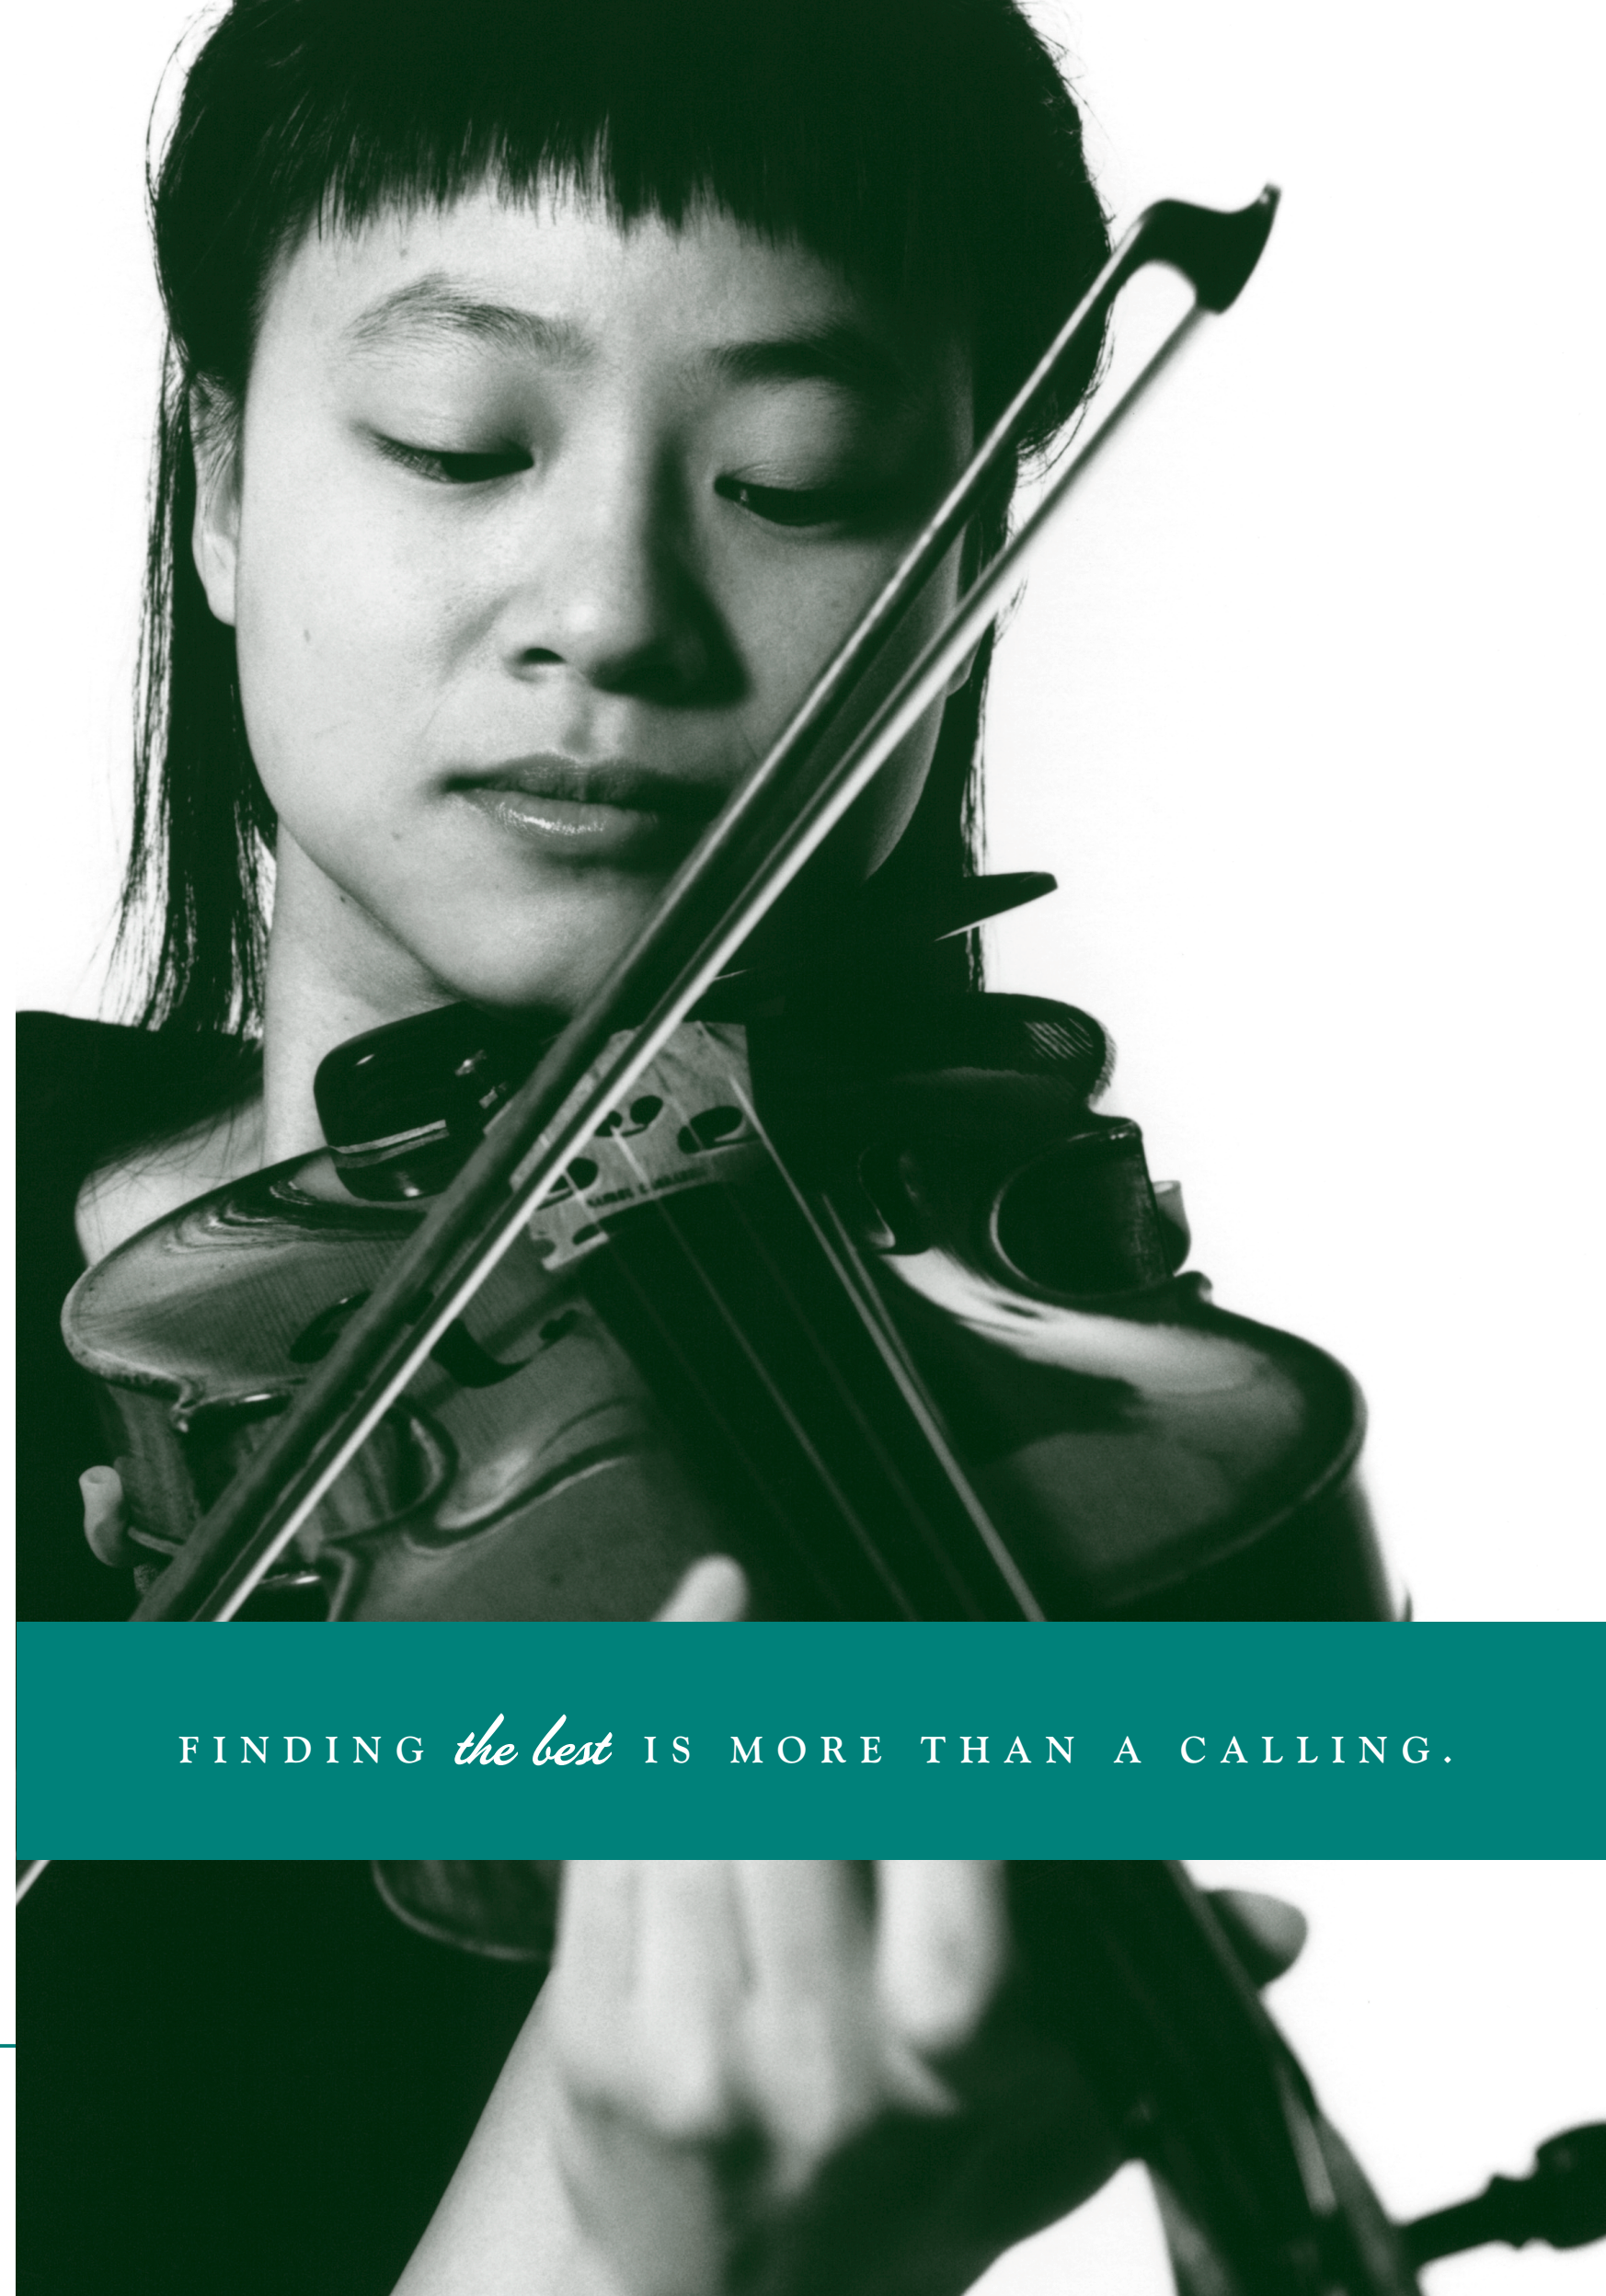

Vericon systems are proprietary. And our software is not supported by a third party or shared with any other background check company.

We offer access through third party HRIS, direct data entry, electronic transfer and fax capabilities.

Our products include FactsTrack Online™, a web-based applicant tracking system designed to handle the entire spectrum of background investigations, allowing the customer access 24/7. We also offer eEmployMe™, an online employment application, which can be customized, and provide immediate access for both the employer and the applicant. Partnering with Vericon simplifies the process and removes days from traditional hiring practices.

Our vow is to strictly maintain the utmost respect for our clients' security measures. This is reflected in our complete range of services, including:

FINDING *the best* IS MORE THAN A CALLING.

GOING THE *extra mile* IS WHERE WE GET STARTED.

*"Business as usual"
just isn't the norm.*

Vericon is a company renowned for setting the standards in our industry.

Our philosophy is most aptly described as "high-tech, high touch."

We strive to keep our products cutting edge and our clients completely informed and satisfied.

Our staff is specially trained in maintaining very close relationships with all our customers to ensure our services are properly integrated with our clients' growing and changing requirements. This intensive training has also proven highly beneficial to companies involved in mergers or acquisitions where the need exists to quickly and efficiently meet hiring and employment standards. Our clients know Vericon ensures the quality of staff additions.

By choosing Vericon, every client is assigned a designated Account Team, each created to strategically analyze the range of services required and begin the transition and implementation of a specific background program. We provide each client with a fully -informed team of professionals who maintain a constant communication flow both to and from the client. This ensures timely, responsive reporting of data and enhances both the quality and delivery of our services. It also promotes the easy exchange of ideas, generating the most appropriate solutions.

At Vericon, our unique approach to business allows us to deliver on our promises. Consistently.

Our job is protection.

At Vericon, we are dedicated to providing protection to our customers from potentially damaging situations by offering services that are in full compliance with the law. It is a commitment that protects our clients from unnecessary litigation when pursuing their legal right to make proper hiring decisions. And it is a commitment our clients have come to count on.

Privacy and identity theft issues are more critical than ever. The sticking point here, however, concerns maintaining imposed governmental privacy standards while simultaneously gathering the proper background information necessary to prevent unsuitable hires.

We have developed a strict set of security guidelines to protect our client's confidential information online. HIPPA certification and a 128-bit secure web protects our web server and web-based applications, while all emails transmitted by our proprietary software program employ data encryption to insure our clients are the only ones who read the investigation results.

We also perform monthly security audits, including system updates and intrusion detection.

Vericon's commitment is to delivering quality services that are in absolute compliance with current and changing regulatory law. It is a commitment that protects our clients from unnecessary litigation when pursuing their legal right to make proper hiring decisions. And it is a commitment our clients have come to count on.

THE DIFFERENCE BETWEEN A GOOD CHOICE *and a great one.*

*Proving the past,
predicting the future.
The right way to get
to know someone.*

Vericon maintains on-going partnerships with a solid, blue-chip client base. In many cases, our relationships span close to a decade.

It is our intention to represent a prudent and lasting investment for knowledgeable clients looking to benefit from intelligent hiring decisions. Our services and products are created to operate as an extension of the client's own business, unlike those services of outside vendors.

To this end, we construct a comprehensive understanding and knowledge of our client's risk management goals and objectives. Simply put, we get to know our clients. The resulting partnership saves companies untold volumes in dollars, but also in time, trouble, and resources. Full-service background investigations and employment selections are crucial to the profitability and longevity of any company. So make "a smart company investment."

Make Vericon, Inc. your partner and choose to profit from an intelligent relationship today.
